Symphia Connect – Improve Response Time, Lower Costs and Increase Operational Efficiency

Integration of safety, security and operational systems like video, access control, license plate recognition and various sensors, increases the situational intelligence of every organization and provides contextualized visibility and insights for high-speed responses when every second counts.

Symphia™ Connect is a robust suite of integrations that facilitates unidirectional or bidirectional flow of data between virtually any system, technology, device or control and the Symphia portfolio of Symphia VMS, Symphia One, Symphia Control and Symphia NowForce.

Transform to an Intelligence-Driven SOC

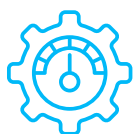

Integrating a third-party system boosts the transition from a video-centric environment to an intelligence-driven SOC. Promoting the “single pane of glass”, the operator’s need to refer to the third-party GUI is greatly reduced.

Improve Operational Efficiency

Concentrate the security operations in one of the Symphia solutions to reduce the number of screens and systems the operator needs to approach. Using integrations, the operator can acquire data from the connected systems, see the state of all the devices, their location on the map, control them, and view the associated cameras.*

Sustain Mission Critical Operations

The integration is constantly active and the integrated system is constantly monitored. A change in any connected device’s health is displayed in Symphia’s built-in Health Check monitor and the operator can be alerted with any status change. In case the integrated system disconnects, the Symphia adaptor can have the ability to store and forward any events that occurred until connection is restored.*

**Available in select integrations with Symphia One or Symphia Control*

Managed Integrations

The Managed Integrations are an integral part of the product lifecycle and they are designed, certified, maintained and supported by Intelicene. As technology advances, so does the Managed Integrations Intelicene deliver, ensuring getting the most out of systems and devices to improve response time, lower costs and increase operational efficiency.

Managed Integrations Benefits

Designed

Perfectly suited to the advanced capabilities of the Symphia portfolio of solutions

Certified

Guaranteed to work with no extra development time

Maintained

Proactively release update when 3rd party or Intelicene rolls out a new version

Supported

End to end support without the need to approach 3rd party vendors

Adaptive Integrations

The Adaptive Integrations are a broad library of unique integrations to non-traditional security controls that were developed by Intelicene to address the most complex challenges. These project driven integrations can be quickly deployed and adapted to unique requirements, reducing the time, effort, and cost of custom development. Additional integrations can be developed based on project design requirements and SDK capability.

Regardless of system type or function, Adaptive Integrations enable connection of third-party systems to the Symphia portfolio of solutions to fuse data from multiple sources, and gain insights to detect and mitigate threats.

Certified Integrations

Certified Integrations are Intelicene certified, Symphia-ready integrations that are designed, developed and maintained by Intelicene's technology partners. Built upon our open Symphia platform, Certified Integrations provide synergy across Symphia and third-party solutions for optimal performance.

Symphia Connect provides a robust suite of integrations to cover any integration scenario.

Symphia Connect Integration Options

	Managed Integrations	Adaptive Integrations	Certified Integrations
Type	General Availability	Project Based	General Availability
Source	Intelicene	Intelicene	Technology Partner
Functionality Covered	All 3rd party available features	Based on project requirements	Based on Technology Partner's design
Connection License	Required	Required	Required

Easily Connect Disparate Systems To Increase Situational Intelligence

Security operators in any organization are using legacy as well as new and emerging technologies. The Situational Intelligence of the organization may be affected unless these technologies are integrated to provide a cohesive security picture. By utilizing Intellicene's Symphia Connect, organizations can easily integrate the Symphia solution they deployed with safety, security and operational systems, to provide a consolidated overview of the security operations. **Contact us now to learn how Symphia Connect can improve response time, lower costs and increase operational efficiency.**

SECURITY // EVOLVED

About Intellicene

Intellicene is a global leader in security analytics software that empowers governments and enterprises. Our open software fuses, analyzes and visualizes disparate data sets at scale to help security organizations find the needles in the haystacks. Over 1,000 government and enterprise customers in more than 100 countries rely on Intellicene's solutions to accelerate security investigations and connect the dots to successfully identify, neutralize, and prevent threats to national security, business continuity and cyber security.

About Intellicene SIS

Intellicene helps enterprises and governments manage complex security operations, fuse information from various sources, analyze vast amounts of data, and gain insight for better incident management, response and investigations. With our solutions, organizations can see what's happening across their operations, make quick and confident decisions for decisive actions. Powered by our Symphia portfolio of solutions, we help our customers orchestrate better outcomes to protect what matters most.
